## ABOUT ME

After completing my bachelor's degree in Computer and Automation Engineering with an experimental thesis in collaboration with the startup Leaf s.r.l., I decided to further my education by pursuing a master's degree in Computer Engineering with a specialization in the Cyberphysical Systems curriculum.

My academic and professional path has instilled in me a passion for researching and developing advanced computer systems, particularly in the field of cyberphysical systems. I am always on the lookout for new challenges and opportunities to contribute to technology's evolution.
